rin art association is pleased to announce the opening of the exhibition, constellation#04.

The Constellation series attempts to create a spatial arrangement of artworks, akin to the connections formed between stars in a constellation. This approach highlights the affinity and relationships among the pieces, utilizing the unique characteristics of the gallery' s three floors to embody these connections.

This fourth edition of the series continues the previous exploration and will be a collection exhibition by gallery owner Takahito Harada.

The world is increasingly becoming a complex and intricate structure, driven by the diversification of numerous elements, which are predominantly categorized by words.

The theme of the exhibition is "boundary." The exhibited works explore the boundaries of manifold worlds. Featuring the works of 23 international artists, the exhibition represents the infinite diversity of the universe, inviting viewers to contemplate the lines drawn between various dichotomies: art and product, high culture and low culture, the everyday and the extraordinary, actuality and reproduction, as well as national borders.

The exhibition suggests boundaries can be connected to each other by finding commonalities among them, enriching the world through their differences.

We hope that you will transform these boundaries into effective connections, forming a constellation of works that resonates with your own self.

Open 11:00-19:00 Closed on Monday and Tuesday
